COMPUMAG 2013 Chairman's Welcome

Since it was first organized in 1976 in Oxford, COMPUMAG has always been one of the most important gatherings of researchers in the field of computational electromagnetics. The conference is aiming to provide a worldwide forum for engineers and physicists engaged in the theory and application of the numerical computation of electromagnetic fields. Thanks to the enthusiasm and efforts of those researchers, computational electromagnetics is playing an increasingly important role in the design optimization of novel electromagnetic devices and systems.

The 19th COMPUMAG Conference is held in Budapest 30 June - 4 July, 2013. The aim of the conference is to discuss recent developments and practical applications in the numerical computation of electromagnetic fields. Reflecting the new trends and rapid progress in the field, authors worldwide have been invited to submit original and previously unpublished contributions. The Conference features oral and poster presentations. The Testing Electromagnetic Analysis Methods (TEAM) Workshop is incorporated into the Conference by inviting contributions on benchmarking and code validation. 747 original and previously unpublished papers have been submitted from 41 countries of 5 continents. After the thorough review process 540 presentations are included in the final program of the conference.

The Conference is organized by the staff of the Electromagnetic Theory Group of the Department of Broadband Infocommunications and Electromagnetic Theory, Faculty of Electrical Engineering and Informatics, Budapest University of Technology and Economics. The Faculty of Electrical Engineering and Informatics carries on the traditions of the more than 230 year old University. The proof thereof is the recognition of its degrees all around the world as well as the involvement and appreciation of their professors and researchers in the international scientific scene and organizations. Almost all multinational electronics and IT corporations have established R&D laboratories and centres attached to various departments of the faculty -- *Ericsson, Morgan Stanley, Nokia, Siemens, Samsung, Huawei, HP, IBM*, just to name a few -- where students can get hands-on information on the expectations of the partner companies.

Budapest with its 2 million inhabitants is famous for its beauty and vibrant commercial and cultural life. It is the academic center of Hungary. It also boasts hundreds of theaters, concert halls and museums. Academic and business life, as well as touristic spots of amusements, attracts millions of visitors to the capital. The venue of the conference -- the Hotel Budapest Hilton located in the beautiful historical Castle District of Buda -- can perfectly serve the organization of an enjoyable and productive COMPUMAG 2013.

We wish you a very pleasant and fruitful stay in Budapest at COMPUMAG 2013!

Poster mounting:

for all posters presented on the day (including the afternoon sessions as well): 8.00 - 10.00 am.

Poster removal:

for all posters presented on the day: 4.00 - 6.00 pm.

Organizers will provide pins to fix the posters.

Upload of oral presentations:

All presentations of the day (including the afternoon sessions as well) have to be uploaded to the computer provided by the organisers by **8.15 am**. You can upload your presentation from **1 July (Monday), 8.00 am** at any time before this deadline above. The computer and the technical staff you have to contact will be located at the rear side of the Ballroom (where the plenary sessions take place). The computer will be equipped with readers for PDF files and PPT files.

Sponsoring the Registration of Best Student Papers

The organizers of COMPUMAG 2013 intend to encourage the participation of young scientists from countries underrepresented at previous Conferences due to financial reasons. Therefore, they are willing to promote the presentation of outstanding papers submitted by students, especially those affiliated with institutions having limited financial means. Depending on the quality of the submitted short papers, 10-15 student participants are sponsored by free participation or by significantly reduced registration fees.

Criteria and Conditions:

1. Any student who is the corresponding author of a paper can apply for the sponsorship with his/her paper.
2. In case of a successful application, the granted student must personally present the selected paper at the conference.

Procedure:

1. Students have to apply for the grant when they submit the 2-page short paper.
2. One person can apply with one paper only.
3. The ICS Board selects the granted students based on the suggestions of the Editorial Board taking into account the results of the evaluation of the 2-page short papers.

Granted students (in decreasing order of points obtained for the evaluation of the short papers):

Name	Affiliation	Country	Portion of registration fee granted	Paper
Ali Akbarzadeh Sharbaf	McGill University	Canada	0,5	OC1-2
Nazari Rasteh Kenari, Moein	McGill University	Canada	0,5	PB5-7
Flisgen, Thomas	University of Rostock	Germany	0,5	OA2-3

Rita Trowbridge Award

A prize to a young researcher in memory of Rita Trowbridge

Criteria and Conditions:

1. The prize will be presented to a young researcher, who is a participant of the conference and registered as a student.
2. The paper may be co-authored, but the young researcher must have contributed significantly, the evidence of this may be demonstrated for example by the fact that he/she is listed as the first author.
3. The paper must have been presented by the young researcher in either an oral or a poster session.

Procedure:

1. A small Awards Committee will be established before each COMPUMAG conference consisting of a chairman appointed by the ICS Board (must be a member of the ICS Board), the Chair (or one of the Co-chairs) of the COMPUMAG Editorial Board (or a person nominated by the Chair of the Editorial Board), a representative of the Local Organising Committee and two other members (could be, but do not have to be, ICS Board members) nominated by the ICS Board.
2. The Local Organising Committee of the COMPUMAG conference will prepare a list of eligible papers and will make this list available to the Awards Committee ahead of the conference. The scores of the referees will be shown on that list.
3. The chair of each conference session will be asked to nominate up to one (in exceptional circumstances two) authors for the award. A special form will be used for that purpose showing which papers are eligible. Such a form, showing all eligible papers in the session, will be prepared by the Conference Organisers. The session chair will be under no obligation to make a nomination.
4. The Awards Committee will meet briefly each day after the sessions to select the candidate papers from that particular day, taking account of the session chairs' nominations, reviewers' scores and their own observations during the day.
5. The Awards Committee will meet immediately after the final eligible paper has been presented on the last day and will make the decision. Up to 6 papers will be selected as to be 'commended' and authors will be issued certificates on behalf of the ICS Board. One of these authors (in exceptional circumstances two for a joint award) will be identified as the recipient(s) of the prize to a young researcher in memory of Rita Trowbridge.
6. The main prize(s) and the other commended papers will be announced at the closing session of COMPUMAG.

Compumag 2013 – Technical Program

Date: Sunday, 30/Jun/2013

3:00pm - 7:30pm	Registration
7:30pm - 9:00pm	Welcome Reception

Date: Monday, 01/Jul/2013

8:30am - 9:10am Ballroom	Opening Session Chair: József Pávó
	On the Shoulders of Giants <u>Bill Trowbridge</u> ¹ , Jan Sykulski ² ¹ D'Arcy's Field's, Frilford, Oxford; ² School of ECS, University of Southampton, United Kingdom
9:10am - 10:10am Ballroom	OA1: Numerical Techniques 1 Session Chairs: Bill Trowbridge, József Pávó
	OA1-1 Computational Performances of Natural Element and Finite Element Methods <u>Yves Marechal</u> , Brahim Ramdane, Diego Pereira Botelho G2Elab, Grenoble Electrical Engineering lab, France
	OA1-2 A Time-Domain Discontinuous Galerkin Trefftz Method <u>Fritz Kretschmar</u> ¹ , Sascha M. Schnepp ² , Igor Tsukerman ³ , Thomas Weiland ⁴ ¹ Graduate School of Computational Engineering, Technische Universitaet Darmstadt, Germany; ² Laboratory for Electromagnetic Fields and Microwave Electronics, ETH Zurich, Switzerland; ³ The Univ of Akron, United States of America; ⁴ Institut fuer Theorie Elektromagnetischer Felder, Technische Universität Darmstadt, Germany
	OA1-3 Trefftz-discontinuous Galerkin and Finite Element Multi-solver Technique for Modeling Time-harmonic EM Problems with High-conductivity Regions <u>Zsolt Badics</u> Tensor Research LLC, United States of America
10:10am - 10:35am	Coffee Break

10:35am - 12:15pm Ballroom Foyer	PA1: Coupled Problems 1 Session Chairs: Bernhard Auchmann, Nelson Sadowski
	<p>PA1-1 Optimum Design of Transformer for Wind-Turbine Generator Considering Temperature Behavior <u>Yeon-Ho Oh</u>¹, Do-Kwan Hong¹, Ki-Dong Song¹, Man Sig Lee², Sung Chin Hahn³ ¹KERI, Republic of Korea (South Korea); ²Korea Institute of Industrial Technology; ³Department of Electrical Engineering, Dong-A University</p> <p>PA1-2 A General Arc-Segment Element for Three-Dimensional Thermal Modelling Nick Simpson, <u>Rafal Wrobel</u>, Phil H. PA1-9

Magneto-Thermal Modeling of the Structural Components in a Single Phase Transformer

Luiz Henrique Jovelli¹, Alexandre Magno Milagre¹, Mauricio Valencia Ferreira da Luz²,
Glauco de Melo Cangane³

¹ENGBRAS Software e Projetos, Brazil; ²Federal University of Santa Catarina, Brazil;

³Siemens Ltda/TUSA Transformers, Brazil

PA1-10

The Optimal Design of HTS Devices

Rajeev Das¹, Fernando Oliverira², Frederico Guimaraes², David Lowther¹

¹McGill University, Canada; ²Federal University of Minas Gerais, Brazil

PA1-11

Flow and Electric Field in Electrostatic Precipitator Using Multiphase Continuum Flow and Charge Simulation Method

André Abelardo Tavares

SATC, Brazil

PA1-12

3D Simulation of Electrically-induced Nano-Patterning on Polymer Films

Qingzhen Yang^{1,2}, Ben Q. Li², Yucheng Ding¹

¹Xi'an Jiaotong University, China; ²University of Michigan-Dearborn, United States of America

PA1-13

Numerical and Experimental Validation of Discharge Current with Generalized Energy Method and Integral Ohm's Law in Dielectric Liquid Media

Ho-Young Lee¹, Jae-Seung Jung¹, Hong-Kyu Kim², Il-Han Park³, Se-Hee Lee¹

¹Kyungpook National University, Republic of Korea (South Korea); ²Korea

Electrotechnology Research Institute; ³Sungkyunkwan University

PA1-14

3D Anisotropic Model for the Numerical Computation of Nonlinear Magnetostriction

Adrian Volk¹, Manfred Kaltenbacher², Alexander Sutor¹, Michael Ertl³, Reinhard Lerch¹

¹Chair of Sensor Technology, University of Erlangen-Nuremberg, Erlangen, Germany;

²Institute of Mechanics and Mechatronics, Vienna University of Technology, Wien, Austria;

³Siemens Energy Sector, Nuremberg, Germany

PA1-15

Contact Temperature Prediction in Three-phase Gas Insulated Bus Bars with the Finite-element Method

Xiaowen Wu, Naiqiu Shu, Hongtao Li, Ling Li

Wuhan University, People's Republic of China

PA1-16

FEM-BEM Analysis of Radio Frequency Drying of a Moving Wood Piece

Teodor Leuca¹, Livia Bandici¹, Gabriel Cheregi¹, Oana Drosu², Marcela Ioana Laza¹

¹University of Oradea, Romania; ²Politechnica University of Bucharest

	<p>PA1-17 Numerical Analysis and Experiment for Micro Particle Collector Using Dielectrophoretic Force <u>Myung Ki Baek</u>¹, Gwang Jun Yu², Il Han Park¹ ¹Sungkyunkwan University, Republic of Korea (South Korea); ²Samsung Electronics Co., LTD, Republic of Korea (South Korea)</p>

PA2-8

Equations of 3-D Electromagnetic Field with Direct Calculation of Flux and Eddy Current Densities

Witold Mazgaj

Cracow University of Technology, Poland

PA2-9

Three-dimensional Computation of Magnetic Fields in Hysteretic Media with Time-periodic Sources

Massimiliano d'Aquino¹, Guglielmo Rubinacci², Antonello Tamburrino^{3,4}, Salvatore Ventre³

¹Università di Napoli "Parthenope"; ²Università di Napoli Federico II; ³University of Cassino, Italy; ⁴Michigan State University, United States of America

PA2-10

Choice of Electrical Field Calculation Method According to the Dielectric Design Criteria

Kosjenka Capuder¹, Željko Štih², Goran Plišić¹

¹Končar Power Transformers Ltd., Croatia; ²Faculty of Electrical Engineering and Computing, Croatia

PA2-11

Modeling and Finite Element Simulation of the Wilson–Wilson Experiment

Holger Heumann², Stefan Kurz¹

¹Tampere University of Technology, Finland; ²Université de Nice - Sophia Antipolis, France

PA2-12

Fast Calculation of Magnetic Fields Produced by Rectangular Cross Section, Arc-Shaped Conductors

Alessio Capelluto¹, Mario Nervi², Paolo Molfino²

¹ASG-Superconductors, Italy; ²Departement of Electrical, Electronic, Telecommunications Engineering and Naval Architecture, University of Genoa, Italy

PA2-13

Nonlinear Computational Homogenization Method for the Evaluation of Eddy Currents in Soft Magnetic Composites

Innocent Niyonzima¹, Ruth V. Sabariego¹, Patrick Dular^{1,2}, Christophe Geuzaine¹

¹University of Liège, Belgium; ²Fonds de la Recherche Scientifique, F.R.S.–FNRS, Belgium

PA2-14

Analysis of the Motion of Conducting Sheets in Magnetic Fields

Mihai Maricar¹, Ioan R. Ciric², Horia Gavrilă¹, George-Marian Vasilescu¹, Florea I. Hantila¹

¹Department of Electrical Engineering, Politehnica University of Bucharest, Romania; ²Department of Electrical and Computer Engineering, The University of Manitoba, Canada

MotorSolve - for SRM, IM, DC and BLDC machine design

MotorSolve is the highly accurate electric machine design software for SRM, IM, brushed and brushless DC machines, which combines an easy to use template-based interface with an automated FEA solver.

Integrated into the single design environment is MotorSolve Thermal – a 3D automated FEA analysis module that analyses the effects of heating and different cooling methods on machine performance.

MagNet 7 - Magnetic Design Software

MagNet is a general purpose 2D & 3D FE analysis software for applications such as electromechanical devices, non-destructive testing (NDT), induction heating, power electronics, sensors, and industrial transformers. MagNet can be coupled to ThermNet for thermal analysis, OptiNet for optimisation, and 3rd party software tools such as PSIM and Simulink, Microsoft Office, etc.
